Repronomics research EBVs from the				
April 2021 evaluation identified				
the sire's EBV to be above average,				
average or below average compared				
with other sires with 10 or progeny				
for the trait. Each category contains				
approximately a third of the sires (from				
all breeds), i.e. an above average sire				
is in the top 30% of Repronomics sires				
recorded for that trait. ** indicates				
the sire is in the top/bottom 3 of				
Repronomics sires
